BUSINESS TECHNOLOGY

MATRIX Business Technology is a leading IT solutions provider in Jordan, delivering innovative infrastructure, cybersecurity, automation, and cloud services tailored for businesses, governments, and institutions. Our mission is to simplify technology and enable smarter operations — from design to deployment, and beyond.

WELCOME TO OUR COMPANY

MATRIX is a leading IT solutions provider in Jordan, specializing in smart infrastructure, cybersecurity, automation, and cloud services. We help organizations build secure, scalable, and future-ready digital environments — tailored to their business needs.

Company Description

With 20+ years of expertise, MATRIX delivers end-to-end technology solutions for governments, enterprises, and private businesses. We simplify complex systems through certified teams, global partnerships, and a commitment to innovation.

ABOUT US

Company Description

MATRIX is a Jordan-based IT solutions company founded to drive digital transformation across public and private sectors. We design and implement integrated technology environments — combining infrastructure, security, automation, and cloud services — to help organizations operate smarter, faster, and more securely.

Backed by global partnerships and a team of certified experts, we deliver future-ready solutions tailored to real business challenges.

INTRODUCTION FROM OUR CEO

At MATRIX, we believe that technology should be simple, secure, and strategic.

Our mission has always been to empower organizations with solutions that go beyond IT support — enabling real transformation through smart infrastructure, resilient cybersecurity, and seamless automation. We are proud of the trust we've built with our clients and partners, and we remain committed to delivering technology that drives value, efficiency, and growth.

– Ahmad Farhoodh

DIGITAL TRANSFORMATION FRAMEWORK

Our digital transformation framework is built on 4 strategic layers — from consultation to automation — ensuring scalable, secure, and smart operations across all sectors.

Consultation Layer

- Goals Definition
- Technical Assessment
- Solutions Planning
- Project Management

Infrastructure Layer

- Computing
- Networks & Datacenter
- Information Security & Management

Core Business Layer

- Implementing Sajaya
- Core Business Modules
- 3rd Party Business Solutions

Business Automation

- Integration Plan
- API Preparation
- Testing & Deployment

OUR VISION

01. Strategic

To become the region's most trusted digital transformation partner — enabling smarter, safer, and more connected organizations through advanced IT solutions.

02. Technology

To lead innovation in infrastructure, automation, and cybersecurity — setting new standards in how technology drives business performance.

OUR MISSION

01. Simplify Technology

Deliver seamless, scalable, and secure IT solutions that simplify complex digital environments for our clients.

02. Enable Smart Operations

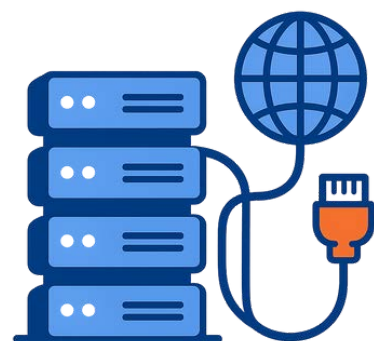

Empower organizations with automation, cloud, and intelligent infrastructure to boost performance and reduce operational overhead.

03. Build Long-Term Partnerships

Collaborate with clients and global vendors to create sustainable, future-ready technology ecosystems that grow with business needs.

OUR SOLUTIONS

IT Infrastructure

From structured cabling and servers to data centers and network design, we build robust infrastructure foundations that support secure and scalable business operations.

Cybersecurity Solutions

We protect your entire digital ecosystem using firewalls, endpoint protection, threat monitoring, and cybersecurity governance tailored to your organization.

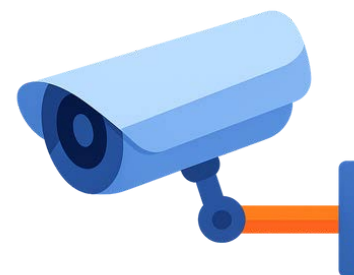

Business Automation

We streamline operations through automated workflows, process digitization, ERP integrations, and task management systems — enabling faster decisions and reduced manual effort.

Computing & Printing

Supply, configure, and maintain computing devices, workstations, laptops, and professional printing solutions — aligned with business performance needs and budgets.

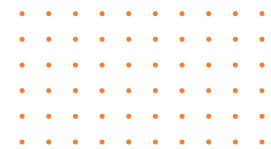

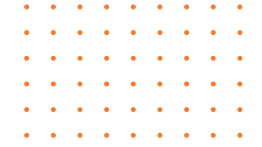

Security & surveillance

Comprehensive surveillance systems, access control, video analytics, and monitoring platforms to secure facilities and assets around the clock.

Smart Solutions

We deliver IoT-powered systems for smart buildings, energy efficiency, and automated control — integrating sensors, cameras, lighting, and more for intelligent environments.

Smart IT Infrastructure

Robust and scalable Network Data Center foundations.

Secure and scalable network foundations — from structured cabling to data centers and backup systems.

IT Infrastructure

Networking

Complete wired and wireless solutions, data traffic management, and hybrid/cloud connectivity.

Data Center

Advanced data centers with cooling, power backup, safety, and smart monitoring

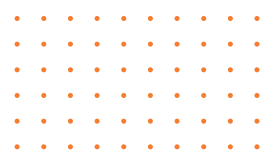

[Learn More](#)

Cybersecurity Solutions

Multi-layer protection for your digital ecosystem

Advanced protection for your digital ecosystem through firewalls, threat detection, and compliance frameworks.

Cybersecurity

Consulting Services

Assessments, penetration testing, and awareness training

Network & Data Security

Securing networks, endpoints, email, and cloud services

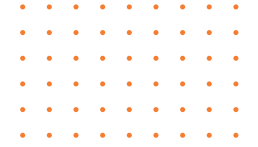

Managing Services

Threat intelligence, SOC monitoring, and brand protection

[Learn More](#)

SECURITY & SURVEILLANCE

24/7 visibility and control over your environment.

Integrated security systems including CCTV, access control, and real-time video analytics — designed to protect your facilities, assets, and people.

Security & surveillance

Alarm & Intrusion Detection

Early warning and intrusion prevention systems

Surveillance & Monitoring

Smart CCTV and video analytics

Motion Detection

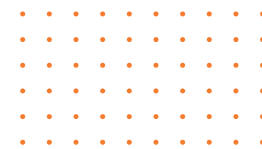

Advanced sensors for perimeter protection

Access Control

Biometric and smart entry systems

COMPUTING & PRINTING

Enterprise-grade computing and printing solutions

Powerful servers, storage systems, and enterprise printing devices — combined with high-performance desktops and laptops. MATRIX delivers scalable, reliable, and cost-efficient technologies designed to support critical business operations and enterprise growth.

Computing & Printing

Enterprise Computing

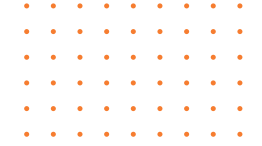

Servers, storage, virtualization, and business continuity

Power Computing & Printing

High-performance workstations, VDI, multi-seat setups, specialized devices, and managed print services.

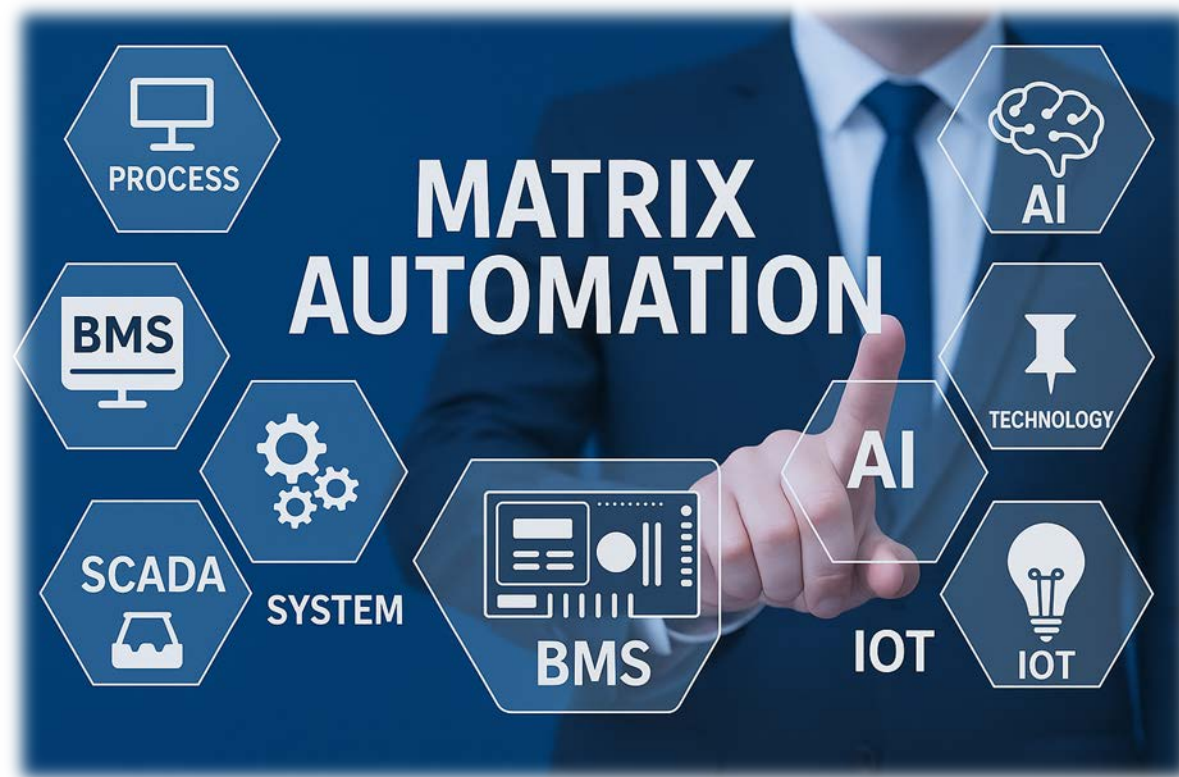

BUSINESS AUTOMATION

Faster operations through intelligent workflow automation

Streamline daily operations with process automation, ERP integration, and smart dashboards — enabling faster decisions and reducing manual effort.

Business Automation

System Automation

Automating operations with smart technologies such as BMS and IoT.

Expert Consultation Services

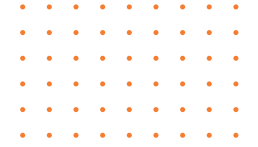

Digital transformation and cybersecurity consulting to support projects

Business Applications

ERP systems, project and quality management, and secure business software

[Learn More](#)

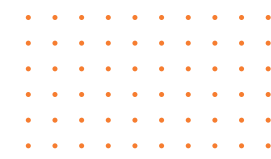

SMART SOLUTIONS

Enterprise-grade automation powered by IoT and AI systems.

We deliver smart solutions for institutions and enterprises — integrating sensors, automation, lighting, HVAC, and energy systems.

Our goal: improve efficiency, enable centralized control, and build intelligent spaces for modern business environments.

Smart Solutions

E-Forms & Invoicing

Electronic forms and billing solutions

Workflow & Self-Service

Automated processes and self-service platforms

Virtual Collaboration

Platforms for remote education and work

Multi-Seat Labs & Classrooms

Efficient shared computing for education

Chromebook & AI Teaching

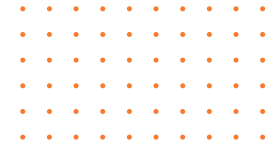

AI-powered learning technologies

Smart Classrooms

Interactive and digital classrooms
